

Medical Procedure

The Baldwin County Regional Juvenile Detention Center provides quality medical care to all the residents in the facility. Most medical treatment is done on site through our contracted medical provider.

The contracted company provides a nurse daily for sick calls and pill checks.

A medical doctor and psychiatrist are provided in an as needed capacity.

A facility therapist provides both private counseling opportunities and groups for all residents in the facility.

If your child becomes ill and must be sent to the hospital for emergency care, you will be notified immediately.
