Agency Comments

ADEM, Scott Brown: Staff asked for comments on July 10, 2026, and no comments were received.

ACA, James Buckelew: Staff asked for comments on July 10, 2026, and no comments were received.

Subdivisions, Fabia Waters: Should the rezoning request be approved, the applicant shall submit a Subdivision Sketch Plan application to initiate the subdivision review process. The sketch plan meeting will allow staff to review the proposed sketch for compliance with Baldwin County Subdivision Regulations and Zoning Ordinance.

Staff Analysis and Findings

The criteria for reviewing zoning amendments are outlined in Section 19.6 of the Baldwin County Zoning Ordinance. Staff carefully considered all of the following factors during the application evaluation:

(a) Degree of compatibility of the proposed rezoning with existing and allowable land uses in the vicinity.

The subject properties cover approximately 118 acres and are currently zoned as RA, Rural Agricultural District. A request has been submitted to rezone the property to RSF-1, Residential Single Family District, for residential development. The properties are situated between two municipalities: Foley and Elberta. This area along Comstock Road does not currently have any high-density residential developments and instead is mainly rural with single family residences on 5+ acre lots (with several one acre lots nearby). Subdivisions are located off County Road 95 south of the subject properties.

(b) Degree of conformity of the proposed rezoning to the Master Plan.

The Future Land Use Map (FLUM) represents a combination of development and environmental suitability factors, which direct growth and development patterns for the unincorporated areas of the County. The FLUM identifies the majority of the subject properties as a Rural / Agriculture / LID (low impact development) potential area. This place type allows for RR, RA, and RSF-E zoning districts. The properties are also adjacent to a Rural Crossroads Center node, which serves RR and RA Zoning Districts by providing small-scale shops, restaurants, and local-serving businesses.

(c) Proximity of the proposed rezoning to existing transportation network and utility infrastructure.

The subject properties are situated on a local road and a major collector. Comstock Road functions as a local road, providing access to residential and smaller commercial properties and connecting other local roads to a major collector. County Road 95 functions as a major collector, facilitating traffic flow while providing direct access to residential and commercial properties.

(d) Timing of the request and development trends in the area.

Planning District 22 was established in 2002. Most of the surrounding area is characterized by agricultural development and single-family residences. The northern portion of County Road 95 has historically functioned as a rural and agricultural area, but there is a growing trend of single-family residences on 4+ acre lots in the vicinity.

(e) Impacts on environmental conditions of the vicinity or the historic resources of the County.

There is a small area of potential wetlands in one of the parcels. No known historic or cultural resources will be impacted.

(f) Impacts to the health, safety and welfare of the County and the vicinity.

The proposed request should have no impact on the health, safety and welfare of the subject properties or surrounding properties.

Staff Comments and Recommendation

Upon review of the *Factors for Reviewing Proposed Zoning Map Amendments* specified within Section 19.6 of the Baldwin County Zoning Ordinance and themes of the Baldwin County Master Plan, staff has determined that the requested Zoning Map Amendment is **inconsistent** with the factors specified within the Baldwin County Zoning Ordinance and is **inconsistent** with the Baldwin County Master Plan Future Land Use Map.

The requested Zoning Map Amendment was also evaluated using the Smart Growth Scorecard (attached) which **somewhat does not support** the request.

RURAL/AGRICULTURE/LOW IMPACT DEVELOPMENT POTENTIAL AREAS

Rural Development Potential Areas include large lots, open space views, and a large buffer distance between buildings. Residential homes may be on large tracts and could include estate homes and working farmland. The development pattern may also include conservation-based subdivisions to allow for the clustering of residential dwellings to protect open space that is valued for natural resource protection—such as stream buffers, mature forest habitat, or wetlands—working farmland, or recreational amenities. Lands within these areas should be developed with additional Low Impact Development (LID) standards and buffers to limit the impact to adjacent critical environments. At key rural crossroads, rural centers or nodes could allow for a combination of retail and service uses to meet the needs of the community.

SMART GROWTH SCORECARD TOOL

Score each element based on the following: +2 (Strongly Supports), +1 (Somewhat Supports), -1 (Somewhat Does Not Support), and -2 (Strongly Does Not Support). Each category will be totaled and then combined for a final score to evaluate whether the development aligns with the vision and themes of the Master Plan. The following final score ranges will be used in this evaluation.
