Staff Analysis and Findings

The criteria for reviewing zoning amendments are outlined in Section 19.6 of the Baldwin County Zoning Ordinance. Staff carefully considered all of the following factors during the application evaluation:

(a) Degree of compatibility of the proposed rezoning with existing and allowable land uses in the vicinity.

The subject property covers approximately 3.05 acres and is currently zoned as RA, Rural Agricultural District. A request has been submitted to rezone the property to RSF-1, Residential Single Family District, to subdivide the property. The minimum lot size for RA is 3 acres and the minimum lot size for RSF-1 is 30,000 square feet. RSF-1 is the next level of zoning that would allow for a lot split while meeting the minimum lot size requirements.

(b) Degree of conformity of the proposed rezoning to the Master Plan.

The Future Land Use Map (FLUM) represents a combination of development and environmental suitability factors, which direct growth and development patterns for the unincorporated areas of the County. The FLUM identifies the subject property as Moderate Development Potential. This place type allows for RSF-1 and RSF-2 (Residential Single Family Districts), which encourages a variety of home types from large and medium-lot single-family detached homes to duplexes and townhomes. The subject property is also within a mile of two Neighborhood Center nodes, which encourage small-scale shops, restaurants, and small parks.

(c) Proximity of the proposed rezoning to existing transportation network and utility infrastructure.

The subject property is situated on a Local Road (Feely Road). Local roads primarily provide access to adjacent homes and businesses rather than long-distance travel. The subject property is also approximately 0.07 miles from the Town of Elberta boundary line. Utilities are already in place.

(d) Timing of the request and development trends in the area.

Planning district 32 was established in 1995. This area has historically been largely rural, with commercial row crop agriculture, sod farming, and family farms, and single family detached residences on large lots. Development in recent years has been concentrated along US Hwy 98, including new subdivisions and RV Parks and the adaptive reuse of historic buildings.

(e) Impacts on environmental conditions of the vicinity or the historic resources of the County.

There are no potential wetlands within the property boundaries. No known historic resources will be impacted.

(f) Impacts to the health, safety and welfare of the County and the vicinity.

The proposed request should have no impact on the health, safety and welfare of the property or surrounding properties.

Staff Comments and Conclusion

Upon review of the *Factors for Reviewing Proposed Zoning Map Amendments* specified within Section 19.6 of the Baldwin County Zoning Ordinance and themes of the Baldwin County Master Plan, staff determined that the requested Zoning Map Amendment is **consistent** with the factors specified within the Baldwin County Zoning Ordinance and is **consistent** with the Baldwin County Master Plan Future Land Use Map.

The requested Zoning Map Amendment was also evaluated using the Smart Growth Scorecard (attached) which **strongly supports** the request.
